PROFESSIONAL SUMMARY

Aspiring Data Analyst with practical experience in IoT systems and data management, proficient in SQL and business reporting. Demonstrates strong analytical skills in data validation, KPI tracking, and trend analysis. Eager to leverage technical expertise and a passion for insights to drive data-informed decision-making.

PROJECTS

Amazon Fulfillment Efficiency Analysis 🔗

Python, Excel, Tableau

Analyzing over 5 million customer orders to evaluate fulfillment efficiency, cancellation trends, and revenue leakage in a dynamic e-commerce environment. Utilized Python, SQL, Excel, and Tableau to process data and generate insights, while developing a comprehensive KPI dashboard to monitor key performance indicators. Identified significant variations in fulfillment outcomes through cohort analysis, informing strategies for optimizing revenue realization and improving operational efficiency.

LinkedIn Hiring Efficiency Analysis 🔗

Python, Excel and Tableau

Identified inefficiencies in the recruitment process by analyzing over 100k recruitment data points to understand candidate selection rates across various job levels and departments. Utilized Python, SQL, Excel, and Tableau to perform comprehensive data analysis and visualize key insights through a KPI dashboard. Employing A/B testing concepts led to the identification of improvement opportunities in the hiring process, contributing to enhanced efficiency in candidate selection.

EXPERIENCE

Technical data Analyst — Envirozone India Pvt Ltd

Ghaziabad, UP | Dec 2025 – Present

- **Data Analysis:** Conducted analysis of 10,000+ IoT sensor records to optimize system performance, identify anomalies, and support data-driven operational decisions.
- **SQL:** Executed complex SQL queries to extract and validate over 10,000 IoT records, enhancing data quality and ensuring actionable insights for operational reporting.
- **Dashboard Development:** Created and maintained 50 interactive KPI dashboards, improving performance tracking and streamlining business reporting processes.
- **Data Management:** Facilitated seamless real-time data integration and enabled CPCB/SPCB connectivity across 300+ industrial monitoring sites, enhancing data accuracy and accessibility.
- **Data Cleaning:** Cleaned and validated **10,000+ IoT records**, resolving missing values, duplicates, and inconsistencies to improve data reliability.
- **Trend Analysis:** Executed trend analysis on over 10,000 IoT records to uncover performance patterns, detect anomalies, and highlight opportunities for system optimization.
- **Sales and Marketing Analysis:** Developed over 200 tailored technical proposals and quotations, aligning with client specifications to enhance engagement.

EXPERTISE

Tools/Platforms: Excel, Tableau

AI Tools: Data Analysis, Claude, ChatGPT, Gemini

Languages: SQL, Python

EDUCATION

ITS Ghaziabad — Ghaziabad

Bachelors in Computer Applications

Jan 2022 – Present

Greenfields public school — New Delhi

Class 10th – 12th in Humanities

Jan 2019 – Jan 2022

CERTIFICATIONS

NextLeap Top Fellowship Badge — NextLeap 2025

NextLeap Data Analysis Using Excel — NextLeap 2025

NextLeap Data Analysis Using SQL — NextLeap 2025

NextLeap Data Visualization Using Tableau — NextLeap 2025

NextLeap Data Analysis Using Python — NextLeap 2025
